

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

The Indiana's Telephone Privacy law has improved my time at home.

The Indiana's Privacy law has been very helpful in keeping the unwanted calls from solicitors. Every night my phone would ring and there was always someone selling something and I am not interested.

I feel it is importance to keep what we have established in Indiana with the new law that was passed. I don't feel like someone should take this option away from us.
